

PATEL JENIKUMAR

Dev-Ops Engineer

About Me

A results-driven DevOps Engineer with 4+ years of experience in automating infrastructure, streamlining deployments, and ensuring system reliability. Proven ability to design, implement, and manage CI/CD pipelines, cloud infrastructure, and containerized applications. Expertise in AWS and GCP cloud platforms, with a focus on infrastructure as code, configuration management, and monitoring. Passionate about leveraging DevOps principles to improve efficiency and accelerate software delivery.

Experience

LOGIX BUILT SOLUTIONS PVT.LTD.

Sr. Server and Network Admin [February 2022 - Present]

- Responsible for overseeing the administration of hardware, network, and servers to ensure optimal performance and reliability.
- Designed and planned the organization's network architecture and security measures to align with business requirements and ensure data protection.
- Collaborated with network engineers to ensure the stability, security, and scalability of systems, guaranteeing minimal downtime and maximum productivity.
- Designed, deployed, and managed AWS Cloud infrastructure using EC2, VPC, EBS, and Lambda, including the setup and configuration of ECS clusters for running containerized applications, enabling scalable and secure cloud-based solutions.
- Provided comprehensive support to clients and developers, including cPanel hosting, domain management, and server maintenance, ensuring seamless operations and high customer satisfaction.
- Implemented and maintained Sophos firewall configurations to strengthen network security, prevent unauthorized access, and protect sensitive data.
- Configured Sophos Firewall VPN to enable workers to have secure remote access, ensuring business continuity and flexibility.
- Managed Sophos firewall rules by configuring port forwarding, allowing clients to access their demo websites or projects securely and efficiently.
- Spearheaded the configuration of VMware ESXi virtual machines, achieving an increase of over 80% in processing speed for critical workloads while troubleshooting issues that led to faster incident resolution times by two hours per week.
- Designed, deployed, and managed GCP Cloud infrastructure, enabling scalable and secure cloud-based solutions.
- Deployed applications using GCP Cloud Run, which provided scalable and secure cloud-based solutions for containerized deployments, as part of my work with GCP cloud computing services.

OptimumBrew Technology LLP

Network Engineer [January 2020 – January 2022]

- Managed server administration and network configurations, ensuring optimal performance.
- Troubleshoot and resolved the most complex network performance and connectivity problems.
- Provided hardware and network support to other programmers and developers to ensure system efficiency.
- Managed FortiGate Firewall, enhancing network security and reducing threats during Covid time.

PRakshal IT academy

IT Infrastructure Management Service faculty [September 2017 – January 2020]

- Conducted training sessions on hardware and networking for over 40 students, with a 95% student satisfaction rate.
- Assisted in curriculum development and student assessments.

D N K TECHNOLOGIES PVT LTD

Network Engineer [January 2017 – August 2017]

- Provided network support and troubleshooting, resolving issues.
- Assisted in network setup and configuration, contributing to successful project completions.

Technical Expertise

- **Cloud Platforms:** AWS (EC2, VPC, IAM, S3, EBS, EKS, Lambda), GCP (Compute Engine, VPC, IAM, Cloud Storage, Cloud Run)
- **Containerization and Orchestration:** Docker, Kubernetes
- **CI/CD:** GitLab CI/CD, GitHub Actions
- **Monitoring and Logging:** Prometheus, Grafana
- **Operating Systems:** Linux (Red Hat 7, CentOS, Ubuntu, Debian), Windows Server (2012 R2, 2016, 2019)
- **Networking:** TCP/IP, DNS, DHCP, HTTP/S, FTP, SSH, VPN, Firewall Management (Sophos, FortiGate)
- **Virtualization:** VMware ESXi

Certification and Training

- Cloud Computing Expert Course from Prakshal IT Academy, Surat (2016-2018)
- Red Hat Certified System Administrator (RHCSA) (June 2018)
- Certified English Course from MOEC Institute, Surat - B+ Grade (December 2015)

Achievements

- Awarded for Technical Support Dynamo at Logix Built Solutions Ltd. (October 2023)
- Awarded for Best Server Support Engineer at Logix Built Solutions Ltd (October 2022)

PROJECTS

Deployed a WordPress website on an AWS ec2 for a company product that helps people find **Pandits Near Me**.

This involved:

- Setting up and configuring the ec2 instance.
- Installing and configuring WordPress.
- Optimizing the website for performance and security.
- Ensuring the website was reliable and accessible to users.
